

## MF-261 GLAND PACKING

This packing is manufactured from the highest quality of P.T.F.E. yarns having a high content of encapsulated graphite.

The high content of graphite permits to work in high speed and the P.T.F.E., base of filaments, gives high chemical resistance. Excellent packing for pumps and valves, with an extraordinary has a high flexibility and adaptability that permits a more reliable solution for problems with sealing

This packing permits to work in centrifugal pumps, valves and alternative movement equipments, also in mixers, agitators, and general in every kind of equipmet. This packing can be considered as a universal except hard oxidants , like; nitric acid and alcaline melted materials.

This packing is specially recommended for centrifugal pumps of high speed.

### Applications

- Packing for every kind of equipments, pumps and valves.
- Recommended by MONTERO for use in centrifugal equipments and agitators. Equipments that require a packing with a low coefficient of friction.
- Equipment in:
  - Refineries, Petrochemical and Chemical , Sugar and Paper Industry
  - Thermal and Nuclear Power Generation Plants
  - Steel Mills and Foundries
  - Shipbuilding Industry
  - Mining and Cement Industry
  - Pharmaceutical and Process Industry
