

MS-315 PACKING

Packing made from PARA-ARAMIDA filaments impregnated with PTFE and lubricants. It has very high mechanical resistance, therefore installation instructions should be carefully followed in order to prevent pump shaft damage.

This packing is indicated for general services and it is specially designed for sugar and paper industry and for services with highly abrasive and viscous fluids, where the aramid's high mechanical resistance prevents wear at high working pressures.

This is a high quality universal packing used mainly in pumps and mixers under high responsibility conditions, though it can be used in a wide range of applications.

Please, follow carefully MONTERO's installation procedures.

Applications

- Packing for all kinds of equipment, pumps and valves ("ball", "globe" and "gate").
- Recommended by MONTERO for use In applications with abrasive fluids.
- For equipment in:

Refineries, Petrochemical and Chemical,
Sugar and Paper Industry
Thermal and Nuclear Power Generation Plants
Steel Mills and Foundries
Shipbuilding Industry
Mining and Cement Industry
Pharmaceutical and Process Industry
