

MS-360 PACKING

Packing made from a combination of PARA ARAMID synthetic filaments covered with PTFE in the corners with a high quality PTFE graphite-encapsulated filament.

The PARA ARAMID synthetic filaments confer a high mechanical resistance to this packing and the PTFE with graphite ensures good chemical resistance with heat dissipation. Very flexible universal packing for use in pumps.

This is a high quality universal packing to be used mainly in pumps and mixers under high responsibility conditions, but that may also be used in a wide variety of applications.

Specially recommended for gate valves.

Applications

- Packing for all kinds of equipment, pumps and valves (“ball”, “globe” and “gate”)
- Recommended by MONTERO to be used in valves, especially in knife gate valves.
- For equipment in:
 - Refineries, Petrochemical and Chemical, Sugar and Paper Industry
 - Thermal and Nuclear Power Generation Plants
 - Steel Mills and Foundries
 - Shipbuilding Industry
 - Mining and Cement Industry
 - Pharmaceutical and Process Industry
