

MF-357 GLAND PACKING

This packing is manufactured from white synthetic filament, braided by the traditional diagonal braiding method, with P.T.F.E. dispersion.

After braided, has a second P.T.F.E. AND GRAPHITE Impregnation with special lubricants in order to make easier the start.

This is the best alternative to the old vegetables , jute, cotton and sebum packings, due to the low cost and good performance in low working conditions.

MF 357 packing is produced for centrifugal pumps, valves and dynamic equipments in low not aggressive conditions, even in vacuum equipments.

This packing is specially recommended where an economical alternative is required. This gland packing is FREE OF SILICONE.

Applications

- Packing for valves and every kind of shafts of “ball” “globe” and “gate” valves

- Recommended by MONTERO for use in water valves and pumps, water treatment, and general services in the industry.

- Equipment in:
Refineries, Petrochemical and Chemical , Sugar and Paper Industry
Thermal and Nuclear Power Generation Plants
Steel Mills and Foundries
Shipbuilding Industry
Mining and Cement Industry
Pharmaceutical and Process Industry
